Contents:

AISS: Editorial Board ................................................................................................... i
AISS: Call For Paper ................................................................................................... vi

< PART 1 >

An Effective DEA-AHP Algorithm for Evaluation of Emergency Logistics
Performance ................................................................................................................ 1
Jiyong Zhang, Shaochuan Fu

Learning Solution Structure Knowledge To Speed Up Planning Later .......... 9
Ai-xiang Chen, Guixu Hu, Xiao-hong Ma, Taoxia Lin, Yunyuan Luo

Task Allocation Negotiation Mechanism in the Clustering-based Personal
MANETs ........................................................................................................... 20
Yang Yang, Keping Long, Xuesong Qiu

The Application of Formal Concept Analysis and Scoring Mechanism in
Ontology Search System ............................................................................................ 29
Hong-sheng Xu

Understanding Online Group-Buying Intention: the Role of Trust, Trust
Transference and Conformity ..................................................................................... 37
Meng-Hsiang Hsu, Cheng-Se Hsu

Optimistic Fair Contract Signing Protocol Based on Hybrid Verifiably
Encrypted Signature Scheme ..................................................................................... 46
Li Chen, Chunxiang Gu

Dynamic Simulation for Three-Dimensional Micro-Structure of
Magneto-rheological Fluids ........................................................................................ 55
Liu Yongzhi, Liu Xinhua, Liu Hao

Study on Application of Intelligent Mobile Phone Virus Prevention based on
Genetic Fuzzy Inference System ............................................................................. 62
Wang Yunwu, Huang Waibin

The Competitiveness Analysis of the Power Enterprises Based on the Entropy
Matter-Element Model .............................................................................................. 71
CI Tie-jun, Wu Yang

A Cognitive Networks State Prediction Algorithm Based on SVM Improved
by Weighted RBF Kernel Function ......................................................................... 81
A Novel Vector Quantization Technique Using Block Mining in Image Compression

Dual-Threshold and Gate-Length Biasing of Pass-Transistor Adiabatic Logic with PMOS Pull-Up Configuration

Reliability Assessment of In-service Components Based on Variable Fuzzy Theory

The Development of Distributed Denial of Service Based on Time Series PDD

Design and Implementation of MSQL Server Database System Model

Finite-Time Stabilization of Nonholonomic Mobile Robots Subject to Delayed Forward Velocity

The Order Measure Model of Collaborative Knowledge Structure

The Development of Internet of Things in Coal Mine Based on Rough Set

MNEMO (Methodology for Knowledge Acquisition and Modelling): Definition of a Global Knowledge Management Approach Combining Knowledge Modelling Techniques

Improving the Security of Protected Wireless Internet Access from Insider Attacks

Research on Efficiency and Efficiency Dynamic Change of China Accounting Firms Based on DEA-Malmquist Index Model

Relationship between Covering–based Rough Sets and Free Matroids
Security Analysis for a Ciphertext-Policy Attribute-Based Encryption Scheme
Fugeng Zeng, Chunxiang Xu, Xinpeng Zhang

Analysis on Transmission Capacity of DWDM system
Xiaobo Meng, Xue Chen

CF_OSSDL: An Optimum Space Step Distance Localization Algorithm of Wireless Sensors with Correction Factor in Ship Area Networks
Liu Yang, Xing Jianping, Wang Ran, Wu Hua, Wu Xiaoming, Liang Haozhe, Fan Weidan

A New Algorithm to Construct Quasi-Cyclic LDPC Codes Based on the Block Lower Triangle Matrix
Chunjiang Duanmu, Zhiliang Huang, Shuihong Zhou

< PART 2 >

XML Keyword Search Based on Node Classification and Hierarchical Semantics
Guo Youqiang, Tao Guixiu, Liang Yuqing, Wang Lei, Zhu Honghao

Measuring Two-Dimensional Deformation Using a Single InSAR Pair
Hu Bo, Wang Han-sheng, Jiang Li-ming, Qiang Shen

A Novel Improved Differential Evolution Algorithm for Constrained Optimization Problems
Yongchang Shi, Zongyao He

Research on the Production Scheduling of Printing Enterprises Based on Artificial Bee Colony Algorithm
Zhong-jie Shen, Yuan-biao Zhang, Han Qi, Qing-long Wu, Yu-hong Xia, Jia-lin Liu

The Mechanism of Wireless Sensor Network Data Collection Based on Mobile Agent
Xian-tong Huang, Jing Zhang

A Multi Population Genetic Algorithm Guided with Randomized Iterative Search for University Course Timetabling
Meysam Shahvali Kohshori, Mohammad Saniee Abadeh

Power and Performance Analysis for Web Server Cluster
Kaiyu Wang, Zheng Li

Study on the Features of Tourist Behaviors of Residents in Medium and
