Contents:

JCIT: Editorial Board ........................................................................................................... i

JCIT: Call For Paper & Special Issue .................................................................................. v

A Scheduling Algorithm for Private Clouds ........................................................................ 1
Jiandun Li, Junjie Peng, Wu Zhang

A Long-short Block Decision and Time-domain Algorithm Applied to MP3 Encoding ....... 10
Wei-Chih Hsu, Jung-nan Sun, Cheng-Wei Ma

The Improvement of SET Protocol based on Security Mobile Payment .................. 22
Xun-ji Ren, Li-qi Wei, Jun-feng Zhang, Xiaodong Ma

The Mechanism about Technology Diffusion: A Game Theoretic Approach .... 29
GUO Yuanyuan, CHI Renyong

Exposing Image Fuzzy Forgeries based on Dyadic Contrast Contourlet .......... 38
Hui fan, Yongliang Wang, Jinjiang Li

Research on Switching Mechanism for MIMO Mode of 802.11n Wireless Networks ................................................................. 47
Jian Chen, Hewu Li, Feixiong Zhang, Jianping Wu

Building the Ontology System in Semantic Web based on Formal Concept Analysis and Rough Set ...................................................... 56
Rui-ling Zhang, Hong-sheng Xu

Abundant Semigroups With the *-ideal Retraction Property ......................... 63
Ranran Cui

Handover Scheme in LTE-based Networks with Hybrid Access Mode Femtocells ................................................................. 68
Shih-Jung Wu, Steven K.C. Lo

Performance Analysis of DFT-Spread based OFDM Transmission System over Underwater Acoustic Channels ...................................................... 79
Weijie SHEN, Haixin SUN, En CHENG, Yonghuai ZHANG
An Iterative Boundary Node Localization Algorithm based on DV-hop Scheme in WSN ................................................................. 87
Nan Jiang, Xiao Xiang, Chen Huan

A Combined Grey Neural Network Model and its Application in Data Mining ................................................................................. 94
Changjun Zhu, Sha Li, Liping Wu, Zhenchun Hao

Role-based Broadcasting Algorithm in Wireless Sensor Networks .......... 102
Juan Luo, Feng Zhou, Chuanli Gu, Renfa Li

Multi-Focus Image Fusion based on WNMF and Focal Point Analysis ............................................................................................. 109
JianHua ADu, MingHui Wang

A Security Private Data Transfer Protocol Verification and Analysis using Colored Petri Nets .............................................................. 118
Sheng Bin, Gengxin Sun, Fengjing Shao

The Research of PWM Rectifier Unbalanced Power Supply and DSP Implementation ........................................................................... 126
Peng Yanqing, Zhang Ji, Fu Xiao, Wen Qianwen, Chen Zhenshan

A Framework of Knowledge Management System for Support Decision Making on Web-enabled Environment ............................................. 133
Wang Jinbo, Liu Xuefeng, Deng Ming

Performance Analysis of Recharging Scheme of M-SaaS through M-banking .................................................................................. 140
Joseph Cosmas Mushi, Guanzheng Tan, Felix Musau, Cheruiyot Wilson

Simulation Optimization of Emergency Refuge Chamber based on Particle Swarm Optimization .......................................................... 154
Yanbing JU, Yuming YIN, Aihua WANG, Yufang Yin

A QoS-assured Trust-driven Semantic Web Service Discovery Method ...... 162
Bu-Qing Cao, Jian-Xun Liu, Bing Li

Design of Electro-chemical CO Gas Sensor Transducer ............................. 172
Chen Xing, Bai Juhua, Yuan Kuo
Routing Selection Method for Tunnel Design Using Dynamic Search .......... 179
WU Mengjion, ZHANG Yongxing, LIU Xinrong

A New Compound Method of Multi-dimensional Sequential Pattern Mining ................................................................. 185
Guoyan Huang, Na Zuo, Jiadong Ren

A Policy of Cluster Analyzing Applied to Incremental SVM Learning with Temporal Information ........................................ 194
Zhenyu Wu, Jun Sun, Lin Feng, Bo Jin

Coolstream Live Broadcast System based on Ex-SCAMP ................... 203
Wenhong Wei, Yong Li, Xuanzi Hu

Comparative Analysis on E-Commerce Application of Agriculture in China . 210
Kun Fan

Optimize Diagnosability and Sensor Placement in Discrete Event System .. 219
Zhao Jian, Ouyang Dantong, Wang Xiaoyu, Zhang Liming

Receptor Editing-based Clonal Selection Algorithm (REbCSA) for Numerical Optimization Problem ........................................... 225
Hongwei Dai, Yu Yang, Hui Li, Cunhua Li

Empirical Study on the Influence Factors of the Fusion of Informatization and Industrialization of the Enterprise based on the Structural Equation Modeling ................................................................. 234
Ge Zhang, Xin Zhang

Batbold Toiruul, Kyung Oh Lee, Young Han Lee, Aries Kusdaryono, Nurhayati

Research of Trusted Network Architecture in Wireless sensor Networks ...... 252
Xu Wu

The Simple and Equal Algorithm in Graph Coloring Problem of Gerrymandering ................................................................. 260
Dongping Wei, Tianli Lei

Assessment of Capacity of Flood Disaster Prevention and Reduction with 2-tuple Linguistic Information ....................................... 268
Yu Liu, Jiang Xu, Wen Nie
Design and Implementation of Embedded Medical Data Transmission Platform based on HL7/XML System ................................................................. 274
Ning LIU, Jianjian LI

An Advanced Model for Electrical Landfill Leakage Detection .................. 281
Guan Shaopeng, Wang Yuling

Exploring Revenue Distribution of Mobile Value-Added Service Chain based on Game Theory ................................................................. 288
Yongqing Yang, Jinlong Zhang, Yuanyuan Sun, Tai Yin

An Efficient and Provably Secure Proxy Signature Scheme ....................... 294
Jianhong Zhang, Yuanbo Cui, Min Xu, Jiancheng Zou

A New Algorithm for a Fuzzy Vehicle Routing and Scheduling Problem: Imperialist Competitive Algorithm ............................................... 303
Jia-wei Chen, Yuan-biao Zhang, Geng-jia Wang

A Personalized Product Recommender System based on Semantic Similarity and TOPSIS Method ............................................................ 312
Ziming Zeng

Multiplication Algorithm of Large Integers using Finite Discrete Convolution ......................................................................................... 321
Dong Fuguo, Sun Lingling, Tian Yuxin

Artificial Bee Colony Algorithm For Grid Scheduling ................................ 328
K.Vivekanandan, D.Ramyachitra, B.Anbu

Application of Bayesian Networks in Dynamic Event Tree Analysis .......... 340
Zhongbao Zhou, Xuan Zeng, Haitao Li, Siya Lui, Chaoqun Ma

Improved Neural Network based on Dynamic Predication Model of Software Reliability ............................................................................ 349
Changjie Ma, Guochang Gu, Jing Zhao

OWCLCOA Operator and its Application to Comprehensive Evaluating Modeling of Brand Extension in Uncertain Linguistic Setting .......... 358
Hong Tan, Guiwu Wei

IFLOWHM Operator and its Application to Multiple Attribute Group Decision Making ................................................................................. 367
Giwu Wei, Hong Tan
Granularity Control and Cohesion Measurement in Manufacturing Grid Task Decomposition ........................................................................................................... 375
He Yuan, Yu Tao, Zhang Qiling

An ID-based Interoperation Method to Connect Digital and Physical Resources for Developing U-service: A Korea Mobile U-service Case using UCI and mCode .................................................................................................................. 382
Sungbum Park, Gyoo Gun Lim, Namgyu Kim, Sangwon Lee

Research and Implementation of Monitoring System of Presswork Quality in High-speed Printing ........................................................................................................... 397
Houjie Li, Tianshuang Qiu, Guangqiu Chen, Haiyu Song, Yamping Yang

Energy Efficient Dynamic Mixed Key Management Scheme based on Virtual Grid in Wireless Sensor Networks ................................................................................................. 406
Jinxue Zhang, Ming Zhang

Mai Sheng, Wang Keyi, Wang Jian
