Contents:

JCIT: Editorial Board ........................................................................................................ i

JCIT: Call For Paper & Special Issue ............................................................................. v

Uncertain Choquet Integral Operator and Its Application to Product Design Selection ......................................................................................................................... 1
Yingshi Kang, Haining Wang

Towards High-performance Dedicated Control Channel in Multi-radio Multi-channel Networks .......................................................................................................................... 7
Shuqiao Zhou, Yong He, Yanyong Zhang, Ruixi Yuan

Study of Various Electricity Load Management Models Under Campus Scale Smart Grid Environment ................................................................. 19
Jin Wang, Sungyoung Lee, Jeong-Uk Kim

Research and Application of Parallel Computing Technologies based on CUDA and OpenCL ............................................................................................................. 25
Xiangyun Liao, Zhiyong Yuan, Weixin Si, Zhaoliang Duan, Ruixue Mao, Jianhui Zhao

A Robust Feature Extraction Method for 3D Faces ......................................................... 38
Wenhao Zhu, Baogang Wei, Bofeng Zhang and Li Fu

Active XML for Service Discovery in Mobile Environment ......................................... 47
Jing Lu, Xiaodong Zhu, Dunlu Peng, Huan Huo

Study on the Combination Model of Classified Partners in Multi-level Distribution Channel ................................................................................................. 54
Zhu Zhiguang

Cooperative Task Planning Using Improved Decision Tree Algorithm .................. 65
He Bing, Liu Gang, Wang Yuanyuan, Gao Jiang, Wang Hong

SNS/MSNS: Current States, Design Considerations and Future Possibilities .... 73
Gang Wang, Chunhong Zhang, Zhimin Zeng, Hao Wang

A Fuzzy Geospatial Ontology Model and Its Application in Geospatial Semantic Retrieval ........................................................................................................... 85
Chunchen Liu, Dayou Liu, Shengsheng Wang
Delivery of Result Stream based on Relevance of Subscriptions for Context .......................... 98
Han Liu, Jian Ye, Zhenmin Zhu, Renren Liu, Xiaoxuan Zhang

Approximation on MAP/G/1 Queue with N-policy Working Vacation ......................... 110
Guoxi ZHAO, Guangyun CUI

An Improved Algorithm for Euclidean Shortest Paths of Visiting Line Segments in the Plane ........................................................................................................ 119
Lijuan Wang, Li Huo, Dandan He

A Novel Middleware Architecture for Personal Healthcare Information System ................................................................................................................... 127
Mangal Sain, WanYoung Chung and Hoon Jae Lee

The Development of a WBEM-based Storage Management System with Optimal Capacity Allocation ......................................................................................... 139
Jui-Pin Yang

Applying Computational Systems Biology Techniques to Explore Disease-Related Methionine Cycle .......................................................................................................... 151
Austin H Chen, Chenyin Yang

Architecting a Configurable and Reconfigurable RFID Infrastructure …… 162
Jie Wu, Dong Wang, Huanye Sheng

Reliability-aware Algorithms of Multipoint Relay with Application Analysis in the Flooding Broadcast of Link-16 .............................................................................. 176
Pengcheng Luo, Zhaoxiong He, Xiangrong Zeng

Performance Assessment of Decision Making Units Using FDEA-ARI Approach ......................................................................................................................... 189
Zhongbao Zhou, Liting Zhao, Siya Lui, Debin Liu, Chaoqun Ma

The Research and Application of Robust UKF Algorithm for GPS/SINS Integrated System ............................................................................................................ 202
Qiu-Ting Wang, Duo Xiao

Power Aware Ad Hoc On-demand Distance Vector (PAAODV) Routing for MANETS ..................................................................................................................... 212
Binod Kumar Pattanayak, Manoj Kumar Mishra, Alok Kumar Jagadev, Ajit Kumar Nayak
Network Model of Inter-firm Financial Contagion and Risk Assessment of Regional Industrial Cluster ......................................................... 221
CHI Renyong, WU Bao

Fuzzy Optimization Method in Classification ........................................ 231
Wang Ying-fen

Feature Extracting of Business Data Streams with Concept-drifting ........ 235
Ju Chunhua, Shuai Zhaqian, Chen Tinggui

STML: Self-organizing Trust Evolution Model based on Logistic Equation for Internetware ................................................................. 246
Yuxin Dong, Guisheng Yin, Yingjie Wang, Hongbin Dong

A Novel Niche Genetic Algorithm for Multimodal Optimization ............... 255
Yi Zhang, Hu Zhang

Soil Information Fusion Estimation Algorithm by Robust Least Squares and Wavelet Analysis ............................................................ 263
Peiyi Zhu, Zhu Liu, Benlian Xu, Baoguo Xu

Mitigating Control Channel Saturation in the Dynamic Channel Assignment Protocol ................................................................. 271
Shuqiao Zhou, Peter Dely, Ruixi Yuan, Andreas Kassler

A Method for Hesitant Fuzzy Multiple Attribute Decision Making and Its Application to Risk Investment ........................................ 282
Xiang Gu; Ying Wang; Bei Yang

Evaluation of Intersystem Interference between Compass and Galileo ........ 288
RAN Yi-hang, LIU Yu-qi, HU Xiu-lin, KE Ting

QoS Topology Control with Energy Efficiency for MANET ........................ 300
Fujian Qin

Estimating Continuous-Valued Emotion of Real-life Speech .................... 308
Han Wenjing, Li Hafeng, Ma Lin

Authorship Identification for Chinese Texts based on Dependency Grammar..317
Wan Jing, Liu Yuling, Sun Xingming, Sun Decai

Content-based Multimedia Query Implementation ................................. 329
Zongda Wu, Zhongsheng Cao, ChenLang Lu
