Contents:

JCIT: Editorial Board ............................................................................................................. i

JCIT: Call For Paper & Special Issue ........................................................................ v i

Improve Search Efficiency by Changing Web-page Storage Structure for Domain Specific Search............................................................................................................. 1

Sukanta Sinha, Rana Dattagupta, Debajyoti Mukhopadhyay

Dynamic task allocation based on distance of superior probability auction…… 10

Zhenyu Wu, Minhua Xiao, Bo Jin, Lin Feng

An Acoustic Echo Canceller with Blind Signal Separation for Double-talking. 18

Haeng-Woo Lee

Finite-time H-infinity Control of Networked Control Systems with Norm-bounded Disturbance............................................................................................................. 29

Yanling Shang, Fangzheng Gao, Fushun Yuan

Currency Characteristic Extraction and Identification Research Based on PCA and BP Neural Network............................................................................................................. 38

Bu-Qing CAO, Jian-Xun LIU, Bin Wen

Analyzing matched packets on Cisco ACL rules: Theories and Proof............. 45

Thawatchai Chomsiri

Information Quantity-based Decision Rule Acquisition from Decision Tables........................................................................................................................ 57

Lin Sun, Jiucheng Xu, Yanpei Song

A Novel Satellite Data 3-dimensional Visualization Method ......................... 68

Li Xin, Yang Lianhe

A Multiple Attribute Group Decision Making Method with its Application to Emergency Alternative Assessment................................................................. 75

Xiaoyue Liu, Yanbing Ju, Aihua Wang

Web’s Dynamic Session IDs: Design and Analysis........................................... 83

Preecha Notumkar, Thawatchai Chomsiri
A Distributed Nash Q-learning Approach for Optimizing Urban Traffic
Xin-Hai Xia, Lun-Hui Xu, Xian-Yan Kuang

Order Imbalance, Individual Stock Returns and Volatility: Evidence from China
Miaoxin Chen, Hai Lin

EPON Upstream Capacity Sharing with Auction Mechanism
Gang Wang, Tianshu Huang, Zenggang Xiong, Yaogai Hu

H* Mean-square Exponentially Stable Control for a Class of Networked Control Systems with Time Delay and Packet Dropout
Yao Hejun, Yuan Zheng

Chaos synchronization of fractional order time-delay Chen system and its application in secure communication
Jianeng Tang, Cairong Zou, Li Zhao

Combining Rough Set and Principal Component Analysis for Preprocessing on Commercial Data Stream
Xu Huijian, Guo Feipeng

Extrapolated particle swarm optimization based on orthogonal design
Quanxi Feng, Liu Sanyang, Zhang Jianke, Yang Guoping

Intelligent Single Particle Optimizer Based Wireless Sensor Networks Adaptive Coverage
Jia Zhao, Hui Sun

Adaptive Hybrid Feature Extraction for Leaf Image Classification by Support Vector Machine
Lihua Fu, Meng Zhang, Zhihui Liu, Hongwei Li, Tingting He

Automatic Title Generation from Chinese Video Films
Yu-Chieh Wu

Modeling and Analysis of Files transmitting based on Extended Colored Petri nets
Huan Wang, Wen Song
The OWA-VIKOR method for multiple attributive group decision making in 2-tuple linguistic setting

Ming Li, Yanjing Zhang

184

184

Zhanfei Ma, Shuying Yang, Zenggang Xiong

192

Selective Ensemble Classifiers Based on Diversity Analysis for Cancer Microarray Data Recognition

Hualong Yu, Shang Gao, Bin Qin

201

The Key Algorithm and System of Clothing Quality Prediction

Wu Tao, Xianbo Wang, Yu Hengxing, Guo Shuai

209

Fast Information Security Verification Method and its Application in Electric Energy Management Terminal

LIU Junxiu, XIAO Long, LU Liuxiu, SU Xiaowei

217

The Study on Transfer Technology of the Lowcarbon and Environment-Friendly Based on Game Theory

WANG Jian

225

An Approach for Multiple Emergency Materials Dispatch based on the Derivative Loss using Extended Genetic Algorithm

Ling Zhu, Yan Wang, X.H. Meng

232

An Online Hot Topics Detection Approach Using the Improved Ant Colony Text Clustering Algorithm

Gong Zhe, Li Dong, Li Qi, Zhang Jianyi, Xin Yang, Niu Xinxin

243

Collaborative Recommendation Model Based on Social Network and Its Application

Chaobo HE, Corresponding Author Yong TANG, Guohua CHEN, Chengzhou FU, Linlin WU

253

Dynamical Spectrum Allocation of WSNs oriented to Cloud Computing

YANG Jie, JING Junli, ZHANG Donglei, CHEN Lei, YUAN Yuhong

262

Research on Patterns of User Interactions and Media Popularity on Online Social Networks

Renjie Zhou, Huiqiang Wang, Guangsheng Feng, Bingyang Li, Wenjin Jin, Xu Lu

269
A credit risk assessment system for the small and medium enterprises in China

Shi Hui-bin, Li Hong, Liu Lu, Wang Li

Study of ultrasonic signal processing in thickness measurement for non-smooth surface sheet metal

Jianzhong Wu, Yuanjie Fu, Meimei Huo, Jianping Cai

Design of a Novel Energy-aware Storage System named DT-MAID

Xiaoling Xie, Yuelong Zhao, Weijian Zhu, Saiqin Long
