Contents:

JCIT: Editorial Board ........................................................................................................................................ 1

JCIT: Call For Paper & Special Issue .............................................................................................................. v

A Hybrid Approach for the Multi-class Gene Selection Problem ......................................................... 1
Zhixia Yang, Yanmei Zhao

Classification Mining Model for Early-warning System ................................................................. 18
Wang Ying-jen

Cross-realm Client-to-client Password-based Authenticated Key Agreement Protocol for Mobile Devices on Elliptic Curve Cryptosystem ......................... 23
Fengtong Wen, Xuelei Li, Shenjun Cui

Analysis of Microstructure Parameters of Collapsible Loess Based on SEM Images ................................................................. 32
Lingxia Gao, Maotian Luan, Shunjun Li

Remote On-Line Supervisory System of Micro Particle Using Image Analysis ................................................................. 44
Liu Weihua

A New Multimodal Biometric Identification Method with Small Sample Size Based on Iris and Palmprint Integration ................................................................. 51
Xiao-Chi Wang, Jie Xu, and Zhen Li

Development of Intelligent Machinery and IT Convergence Using Case-Based Reasoning ................................................................. 61
Jung-Sook Kim

A Crime Group Identification Model Based on Mobile Communication Vestige Records ................................................................. 69
Gang Wang, Jiliu Zhou, Shusie Qiao, Chongjun Wang, Yuli Lei

Non-convergence Criterion on Slope Stability FE Analysis by Strength Reduction Method ................................................................. 78
T. K. Nian, G. Q. Chen, S. S. Wan, M. T. Luan
Design and Performance analysis of Data mining techniques Based on Decision trees and Naive Bayes classifier For Employment Chance Prediction .......... 89
Sudheep Elayidom.M, Sumam Mary Idikkula, Joseph Alexander

Measurements and Comparative of M/M/1 and M/D/1 Queuing Models of Resource Management in Satellite Systems ................................................................. 99
Pedramhajipour, Leila Mohammadi, Mohammad Reza Keshavarzi

The Design and Implementation of Smart Battery Management System Balance Technology ................................................................. 108
Xiujuan Zhang, Peide Liu, Darui Wang

A Deeply Protected Hybrid Key Exchange Model in Wireless Mesh Networks ............................................................................................................. 117
Qian Wei, Jingsha He, Xing Zhang, Jinning Jia

Protecting Customer’s Privacy by Unlinking Online Behavior and Delivery Address in E-business ................................................................. 127
Feng Gao, Jingsha He, Shunan Ma

Uncertain Trajectory Clustering Based on Uneven Two-step Sampling ............ 135
Zhang Lei, Li Jing, Wang Zhichao

Correlation between Adjustment Decisions of Index Futures Margin and Market Factors .................................................................................................. 148
Tzung-Min Pai, Meng-Long Shih, Shu-Hua Hsiao, Wen-Lin Ho

Study on 4PL Information Platform based on Web Services ........................ 160
Huang Yongbin, Wang Qifeng

A Hybrid TS-PSO Optimization Algorithm .................................................. 169
Yudong Zhang, Lenan Wu

Analysis and Optimization Schedule for Tunnel Engineering Based on Information Management and Visual Simulation ........................................ 175
Yingbo Ji

IQSelect Algorithms for Finding the Kth Value Based on Incomplete Quick Sort Algorithm .................................................................................. 183
Dong Fuguo, Li Yurong, Yuan Da
A New Framework for Video Summarization with Kernel Locality Preservation
Zhongbao Chen, Fuliang Bao, Zhen Li 192

Forward-Secure Weak Blind Multi-Proxy MultiSignature Scheme
J Zhang 201

Sonification-based Electronic Aid System for the Visually Impaired
Jie Xu, Zhigang Fang, Feng Zhou 209

An Effective Method of Sensor Data Transmissions in a Water-Quality Monitoring System
Daehyeon Kwon, Soosun Cho, Ryeomduk Oh 218

An Effective Method for Consistent-Topology Construction of Overlay
WANG Bin, SHEN Qing-guo 224

An Effective Algorithm for Hierarchical P2P Load Balancing
WANG Bin, SHEN Qing-guo 231

Fuzzy Analytic Hierarchy Process for High-speed Rail Train Plan Evaluation on Special Operation Conditions
Du Yan Ping, Jia Limin, Chen Fang, Zhang Zhenhua, Qin Yong 237

Graph-based Topology Analysis of Basin Structure
Qiang Luo, Quan Zhang, Mohsin Hafeez, Hua Xie, Jie Li 245

Simplified Repeated Clipping and Filtering with Spectrum Mask for PAPR Reduction
Jinglan Ou, Xiaoping Zeng, Fengchun Tian, Haowei Wu 251

A Survey of Peer-to-Peer Simulators and Simulation Technology
He XU, Suo-ping WANG, Ru-chuan WANG, Ping TAN 260

Data Reduction Based on Local Hausdorff Measures for Forensic Data
Peng Tao, Chen Xiaoshu, Liu Huiyu, Chen Kai 273

Image Salient Region Extraction Algorithm Based on Improved Visual Attention Model
Hua Zhen, Li Yewei, Li Jinjiang 280
A Method for Intuitionistic Fuzzy Multiple Attribute Decision Making and its Application to Partners Selection for Virtual Enterprises .............................. 291
Zongyong Li, Feng Wang

Combined Features to Maximal Marginal Relevance Algorithm for Multi-document Summarization ................................................................. 298
Zhigang Zhou

Area-Efficient Systolic Multipliers for Finite Field GF(2^m) Based on Irreducible Trinomial ............................................................ 305
Jianjun He, Jiafeng Xie, Mingfang He

Impact of Source Current on Potential Distribution in Electrical Landfill Leakage Detection ................................................................. 314
Guan Shao-peng

An Energy Efficient Dynamic Key Management Scheme Based on Polynomial and Cluster in Wireless Sensor Networks ............................. 321
Haijun Liang, Chao Wang

Study on Correlation between Critical Successful Factors of IT Governance and Governance Performance .................................................. 329
Chiu, Yaw Han, Lu Liu, Chi, Yen Ping

An Improved Method to Secret Message Length Estimation in ±k Embedding Steganography ................................................................. 339
Jiaohua Qin

Two Schemes of Group Buying Initiation in Group Buying Forums .......... 347
Lu Yin, Lu Liu
