Contents:

JCIT: Editorial Board ........................................................................................................ i

JCIT: Call For Paper & Special Issue ............................................................................. v

Part. I

The Influences of Installation Errors on Double Circular Arc Tooth Spiral Bevel Gear Using TCA Method................................................................. 1
Ruiliang Zhang, Tie Wang

An Efficient Algorithm for Time-Driven Data Gathering in Wireless Sensor Networks Using Inter-Session Network Coding....................... 11
Qian Xiao, Kangfeng Zheng, Shoushan Luo, Yixian Yang, Ling Zhang

Effective Image Classification Method Based on Texture and Color......... 19
Zhengli Zhu, Chunxia Zhao, Yingkun Hou

Fast implementation of scalar multiplication using pipeline method........ 27
Ming Li, Daming Zhu

A Dynamic and Fuzzy Modeling Approach for Multi-objective R&D Project Portfolio Selection................................................................. 36
Xiaohua Zhao, Yu Yang, Geng Wu, Jie Yang, Xiaole Xue

Research on Integrated Optimization Problem in a Multi-product Supply Chain Based on Markov Decision Processes........................................... 45
Xing Zhang, Qiuhong Zhao, Guoping Xia

Diffusion of Mobile Phones in China: Application of Bass Diffusion Model........................................................................................................ 54
Huang Rui

Energy-aware and revenue-enhancing Combinatorial Scheduling in Virtualized of Cloud Datacenter.................................................................62
Zhiming Wang, Kai Shuang, Long Yang, Fangchun Yang

Performance Evaluation of LT Coded MPSK Modulation Schemes in the Presence of Doppler Frequency Shift...........................................71
Research on Activity Recognition Method based on Human Motion Trajectory Features..............................................................................................79
Yang YANG, Nannan CHENG, Mengmeng ZHANG

Research on Quality and Safety Traceability System of Fruit and Vegetable Products Based on Ontology...................................................... 86
Yongfeng Wang, Yu Yang, Yongming Gu

Expected Shortest Path Routing for Social-oriented Intermittently Connected Mobile Network................................................................. 94
Jieyan Liu, Ming Liu, Haigang Gong, Jiazhi Zeng

Research on Knowledge Sharing for Customer Collaborative Product Innovation based on Knowledge Grid...................................... 102
XING Qingsong, YANG Yu, LIU Aijun, YAO Hao

Track Methodology Model for Ontology Building and Knowledge Sharing.............................................................................................. 113
Qiang Lu, Xiaolian Li, Wei Zhong

Risk Management of Land Use on Cloud Computing.........................122
Dung-Hai Liang, Peirchyi Lii, Dong-Shong Liang

A novel method for computing the inverse of cardinal direction relations.................................................................................................130
Fang Wang, Dayou Liu, Yiqun Dong

An improved automatic gridding based on mathematical morphology.................................................................................................139
Guifang Shao

Envelope Protocol for Privacy Protection............................................. 147
Yu Wang, Qiuwei Yang

An objective validation for image fusion metrics...................................... 156
Xiaoli Zhang, Xiongfei Li, Ye Sun

Part.2

Simulation of Land Use/Cover Change for Wuhan City Based on GIS and CA

Yingxia Wu, Jiejun Huang, Yanbin Yuan, Wei Cui, Yunjun Zhan

Approximating a Multiconstrained Shortest Path in QoS Routing

Ruimin Yang

A Novel Genetic Ant Colony Algorithm

Yudong Zhang, Lenan Wu

Study on Passive Millimeter Wave Detection of Coating Stealth Targets

Yexin Xing, Guowei Lou, Xingguo Li

Content-based Micro Blog User Preference Analysis

Hui Cheng, Yun Liu, Juan Li, Jiang Zhu, Junjun Cheng

Application of ARIMA model on the prediction of Medium and Long-term Runoff

Jihong Zhou, Xiaobin Zhou, Jian Zhang

Dynamic game theory with incomplete information in opinion dynamic

Yun Liu, ShaoChun Han, YanChao Zhang, JunJun Cheng

Design a Learner Categorized Method in the Use of Online Programmed Instructional Video

Jenq-Muh Hsu, Ting-Wen Chang, Pao-Ta Yu

Research on Multi-view Enterprise Conceptual Model Based on NORM

Jun Zhao, Kai Wang, Fei Wang

A New Heuristic Approach Based on Load Balancing for Grid Scheduling Problem

Amid Khatibi Bardsiri, Marjan Kuchaki Rafsanjani
P-sets and the Reasoning-Identification of Disaster Information
Chengxian Fan, Hongkang Lin

Dual-system Cooperative Co-evolutionary Differential Evolution with Human-computer Cooperation for Satellite Module Layout Optimization
Zi-Hui Zhang, Yan-Jun Shi, Hong-Fei Teng

Research on Distributed Privacy-Preserving Data Mining
Zhe Jia, Lei Pang, Shoushan Luo, Yang Xin, Miao Zhang

A Study of Applying Modified Grey Relational Analysis Approach to Assessment Enterprise Resource Planning System Providers
Chao-Yen Wu, Hsin-Te Chan, Shi-Hua Wang

Jump-CFA: Fast and Memory Efficient Regular Expression Matching for Counting Constraints
Huanyun Wang, Xiaobo Yang, Bin Zeng, Dafang Zhang, Xin Su

Query Analysis and Refinement Algorithm for Information Retrieval
Liu Jianben

Face Recognition Using VQ Histogram in Compressed DCT Domain
Qiu Chen, Koji Kotani, Feifei Lee, Tadahiro Ohmi

Coal resources demand evaluation based on support vector regression with improved quantum-behaved PSO
Guo Lei, Li Shixiang

Delay optimization dependent Stability of WMN-based network control system
Dong Huang, Ning Li

Improved Immune Genetic Algorithm Based on Hybrid Chaotic Maps and Its Application
Aijun Liu, Yu Yang, Xuedong Liang, Hao Yao

Topological Reduction of Knowledge
M. E. Abd El-Monsef, M. ElSafty, M. Swealam
Overview of Homomorphic Encryption Scheme ................................. 442
Xun-yi Ren, Li-Li Wei

Analytical Research on the Efficiency of Smart Grid with Delay Performance of Wireless Sensor Network Based on Queuing Theory ............................................................... 448
Chen-xu Liu, Yun Liu, Zhen-jiang Zhang

An Experimental Study on the User Evaluation Accuracy of Interactive Genetic Algorithms ............................................................... 457
Sun Yan, Wang Wanliang

Adapted-cooperation Recommendation Mechanism for Ubiquitous Services ........................................................................ 468
Lijuan Men, Shaoyong Guo, Lanlan Rui, Luoming Meng

Research on SVM Distance based Credit Scoring Model for Network Management ............................................................... 476
Ling Che, C.J. Hwang, Chunsheng Ni, Bo Jin

A Fast Classification Mask Construction Algorithm for Digital Mammograms ............................................................... 483
Honghong Chen

A Batch CMAC Model Based on Dynamic Information ..................... 489
Ma Zhenglie, Luo Xiaoping, Jinfei Chen, Yunfei Guo

Support Vector Machine Based Particle Swarm Optimization Localization Algorithm in WSN ............................................................... 497
Tao Tang, Qing Guo, Mingchuan Yang

Ordering-based Iterative Maximum-likelihood Detector in Space-time Cooperative OFDM Systems ............................................................... 504
Jinglan Ou, Haowei Wu, Xiaoping Zeng, Lisheng Yang
