Contents:

JCIT: Editorial Board ................................................................................................................ i

JCIT: Call for Papers and Special (Invited) Issues Board ................................................... vi

Performance Characters of OLTP in CMP ................................................................. 1
Lin Deng, Yong Dou, Jing Zhang, Xin Li

Ming Zhang

Application of Data Mining Technique in The Performance Analysis of Shipping and Freight Enterprise and the Construction of Stock Forecast Model .......... 18
Chang-Shu Tu, Ching-Ter Chang, Kee-Kuo Chen, Hua-An Lu

A New Method for Privacy-Preserving Data Mining Based on Weighted Singular Value Decomposition ......................................................... 28
Guang Li, Yadong Wang

The Research of ECG Diagnosis System Based on Support Vector Machines ................................................................. 35
ZHANG Hongjun

The Algorithms of Improved GPC Network Time-Delay Compensation Based on Online Time-Delay Estimation.................................................... 46
Shi Weiguo, Shao Cheng, Sun Zhengyang

The Design and Implementation of Trusted Communication Protocol for Intrusion Prevention System ......................................................... 55
Liang Hu, Wenbo Wang, Kuo Zhao

Using Expansion Algorithm to Identify Protein from Biological Networks ...... 63
Zhigang Zhou

Group Negotiation Decision Method and its Application based on Multi-Issues Combined Programming for High-tech Virtual Enterprise .................... 70
Shan ZD, J Zhao JL

Insights and Improvement to a Structural Clustering Algorithm ....................... 86
Dongming Chen, Xiaodong Chen, Yunpeng Chang, Yongming Liu, Xiaowei Xu

An Anonymity and Authentication Mechanism for Internet of Things .......... 98
Xiaoliang Wang, Xingming Sun, Hengfu Yang, Saeed Arif Shah

A New Hybrid Search Scheme for Video Motion Estimation ......................... 106
Yixin Yan and Shaoliang Meng
Security Analysis of a Privacy-preserving ECC-based Grouping-proof Protocol … ................................................................. 113
Chao Lv, Hui Li, Jianfeng Ma, Ben Niu, Haiyang Jiang

Cost Efficiency in the Life Insurance Industry ................................................................. 120
Shu-Hua Hsiao, Tzung-Min Pai, Meng-Long Shih, Shu-Yi Su

A Reinterpretation of Empirical Mode Decomposition using Spectral Analysis Signal Reconstruction Method: Applications for Price Discovery of Futures and Spot Prices on WTI ………………………………………………………………………… 132
Horng-jinh Chang, Ming-Chu Pai, Y. Jia Goo, Shih-Chang Hsu

Fault Analysis for Flight Control System Using Weighted Fuzzy Petri Nets ……………………………………………………………………………………………………………………… 146
Jiufu LIU, Kui Chen, Zhisheng WANG

A Risk Decision Model of Cruise Line Overbooking System with Multiple Price Classes from the View of Real Options ……………………………………………………………….. 156
Bingzhou Li

The Fast Discovery of Spatial Information Service in Hybrid Network ……… 164
Qingxiang Meng, Zhongliang Fu, Shuang Li

Research on Product Conceptual Design Based on Case-Based Reasoning …. 173
PEIGANG LI, XIANYING FENG, YAOQING SONG

Fractal-based Algorithm for Anomaly Pattern Discovery on Time Series Stream ………………………………………………………………………………………………………………….. 181
Guiling Li, Yuanzhen Wang, Shuhua Gu, Xiaolian Zhu

cDNA Microarray Images Gridding Based on Projection ………………….. 188
Zhou Qifeng, Zhou Qingqing, Yang XiaoQing, Hong Wencai

Efficient Mutating Test Cases Generation Using Mutating Condition Reduction and Model Checker ……………………………………………………………………………………….. 195
Cheng ZHONG, Tie YAN

Longitudinal Network Analysis of a Peer to Peer Community ………………… 202
Weijia You, Lu Liu, Chenggong Lv

A Heuristic Reduction Algorithm Based on Entropy of Attribute ………….. 209
Chen Xinying, Liu Yuefan

Ontology-driven Information Sharing Mechanism in Supply Chain Environment ………………………………………………………………………………………………………………………………… 217
Wei Shi, Hongwei Wang, Fei Yin, James N.K. Liu

Cognition and Decision Making in Construction Engineering and Management: A Case of Construction Project Contract Negotiation …………………… 226
Xiaolong Xue, Qiping Shen, Zhaomin Ren, Jiqi Ni
A Directable and Designable Course Recording System .............................................. 234
Ming-Hsiang Su, Pao-Ta Yu

Hybrid Convergence Pattern and Operation Mechanism for Intelligent Negotiation Support System based on High-tech Network Organization ........... 244
Shan Zi-dan

Automatic Image Registration Using Improved LBG Algorithm ....................... 257
He Bing, Liu Gang, Wang Yuanyuan

HSCEE: A Highly Flexible Environment for Hybrid Service Creation and Execution in Converged Networks ................................................................. 264
Da Zhu, Yang Zhang, Bo Cheng, Budan Wu, Junliang Chen

A Copy Detection Method for Chinese Text by Character Based N-gram ...... 277
Wei Zhang, Lincong Yang, Xingming Sun, Yuling Liu

Chinese Event Identification and Tracking Using Two Phase Clustering Algorithm ........................................................................................................ 283
Jun Tang

The Correlation among Corporate Donation Social Capital and Competitive Advantage ............................................................... 290
TIAN Xueying

P300 Wave based Person Identification using LVQ Neural Network .............. 296
Xin Yang, Jianhua Dai, Huaijian Zhang, Bian Wu, Yu Su, Weidong Chen

Parameter Estimation of LFM Signal With Compressive Measurements ...... 303
Bing Liu, Ping Fu, Cong Xu, Jian-xin Gai

The Effect of Time Constraint on Information Processing in Decision Making: A Computer Stimulate ................................................................. 311
Dawei Wang, Yixin Hu

An Multi-hop Cluster Based Routing Protocol for Wireless Sensor Networks ........................................................................................................... 318
Qi Yang, Yuxiang Zhuang, Hui Li
