Contents:

JDCTA: Editorial Board ................................................................................................ i
JDCTA: Call For Paper & Special Issue ..................................................................... vi

Part.1

A Dynamic Scheduling Method for Data Services Based on P2P Network in Ubiquitous Computing Environment................................................................. 1
Qingcheng Li, Ye Lu, Yuan Tian, Xiaoli Gong, Jie Ma,

WEB APPLICATION VULNERABILITY DETECTION BASED ON REINFORCEMENT LEARNING................................................................. 12
Wang Xin, Wei Gengyu, Yang Yixian

The Study of Security Data Storage Technology in Heterogeneous Wireless Sensors Network................................................................. 21
Fang Rui

Chosen-message Power Analysis Attack Based on the Hamming Weight Model................................................................. 28
CHEN Ai-dong, Wang Juan, XU Sen

Research on Electrooculography Classification Based on Multiple Features......35
Lei Sun, Sun-an Wang, Jin-hua Zhang, Xiao-hu Li

A Fast Search Algorithm for MPEG-4 Video Clips Using Adjacent Pixel Intensity Difference Quantization Histogram Feature...................................................... 43
Feifei Lee, Koji Kotani, Qiu Chen, Tadahiro Ohmi

Hybrid Recommendation method IN Sparse Datasets:Combining content analysis and collaborative filtering................................................................. 52
ZHANG Yao, FENG Yu-qiang

A novel Hierarchical Reputation Model for Wireless Sensor Networks......... 61
Ouyang Xi, Tian Bin, Li Dong, Li Dan, Xin Yang

A Deformable Image Registration Algorithm Using NURBS................................. 70
Jingjing Wang, Hongjian Wang, Yong Yin
Fuzzy Evaluating on Enterprise Competition Based on the SWOT Analysis
Zhisheng Sun

Forest health assessment in the Badaling Forest Farm of Beijing based on GIS and RS
Guijuan Jiang, Xiaoxian Zheng, Yang Hu

Face Recognition using Annulus and Shape Context of Isopiestic Lines under Difficult Conditions
Yin-rong FU, Sheng-yun YANG, De-hui YUAN, Hao-yue LIN

A Distributed Recommender Agent Model based on User’s Perspective SVD Technique
Dussadee Praserttitipong, Peraphon Sophatsathit

Light-weight Proofs of Retrievability in Cloud Archive Storage with Replications
Baoyu An, Liang Zhou, Zhe Gong, Da Xiao, Yixian Yang, Guosheng Xu, Jingxia Chen

Using GPR Spectrum Inversion Method to Improve Recognition Ability of Thin-layer
Qin Yao, Wang Qi-fu

Accurate 3D Nose Tip Localization Using Orientation Invariant Surface Descriptor
Quan Ju, Yingfeng Wang

The Application and Research of Parallel Computing in the Processing of Data Uploaded by CRH EMU Train-Equipped Device
Chun Zhang, Feng Liu, Ting Ren, Yu Shu

An automatic and accurate camera calibration using translational planar object
Shengyong Xu, Dehua Li, Li Zhu

Conceptual Representation of Electrical Components and Circuits
Sabah Al-Fedaghi, Eman Aldahmeli
Model for Evaluating the Enterprise Management Information System in Intuitionistic Fuzzy Setting ................................................................. 182
Yongfeng Wu

Cryptanalysis and improvement of a YS-like user authentication scheme ....... 189
Jiping Li, Shouyin Liu, Shixun Wu

Endpoint Detection of Noisy Speech using Empirical Mode Decomposition.... 196
Manman Li, Hongwu Yang, Weitong Guo, Dong Pei, Hongying Sun

An Improved Contourlet Transform for Iris Feature Extraction............... 204
Zhongliang Luo

A Hybrid Sensory Evaluation and Decision Support System for Vegetable Breeding Selections ............................................................. 212
Liu Xiaoqiang, Jiang Ke, Liu Xia, Song Hui, Zhao Xiaoyan, Ma Yue

Part.2

Prediction of Spring Flow Using Regression Method .............................. 221
Changjun Zhu, Qing Liang, Ming Liu

RDFQ: AQM algorithm based on rate estimation and buffer management with dynamic threshold ............................................................. 230
Guo cuijuan, Miao changyun, Miao jinghong, Wu zhigang

Multiple Watermarks for Management in Medical Image based on DWT ...... 239
Chunhua Dong, Jingbing Li, Xianhua Han, Yen-wei Chen

A Novel Soccer Video Summarization Model Based on Video Time Density Function ...................................................................................... 248
Zhicheng Wei, Xue Yang

Color Correction with Zone System for Color Image .............................. 257
Jzau-Sheng Lin, Yu-Yi Liao, Shen-Chuan Tai

A Facial Image Authentication Method by Embedding PLT-PCA Features .... 266
Qi Han, Zhifang Wang, Qiong Li, Xiamu Niu

Secure Communication via Active Backstepping Control and Synchronization for New Hyperchaotic Systems ............................................... 276
Sung-Hoon Yu, Chang-Ho Hyun, Won-Ho Kim, Mignon Park

Hands and Objects Tracking Method doubling Learning Effect.......................... 287
Jong-Hyun Kim

Dominant Motions Detection in Dense Crowds Based on Particle Video......... 294
Dongping Zhang, Chao Tong, Yafei Lu, Zhongqiu Liu

Numerical simulation for wall interference of antennas in wind tunnel test..... 302
Du Qiang, Yin Yan-chao

Study on Transfer-entropy TOPSIS in Identification External Environments of
Life Cycle Asset Management........................................................................310
Qingyou Yan, Xiaoya Wang

An Approach to Evaluating the Comprehensive Geographical Information
System with Intuitionistic Fuzzy Information..................................................319
Yi Xiao, Qun Wang

Electric vehicles Composite Impacts Index Model........................................326
Dongping Wei, Tianli Lei, Hongya Zhao

Application of Mixed-Weighted-Association-Rules-Based Data Mining
Technology in College Examination grades Analysis..................................336
Hong-chao Chen, Jin-ling Zhang, Ya-qiong Deng

A Novel Ontology-based Tutorial domain knowledge..................................345
Xin-hua Zhu, Qi-feng Tang, Hong-chao Chen

An Novel Interoperable Learning Sequencing Model Based on the Sharable
Sequence Object..............................................................................................353
Jian-hua Luo, Jiangtao Lu, Lanjiang Zhang

Audio Fingerprinting Based on N-grams......................................................361
Qiang Wang, Zhiyuan Guo, Gang Liu, Jun Guo

A New Fast Block Motion Algorithm Based on Octagon and Triangle Search
Patterns for H.264/AVC...............................................................................369
Chunjiang Duanmu, Yu Zhang
Haitao Wang

Virtual Inspection System of Nuclear Power Plants with Nuclear Radiation.....385
Guangwei Yan, Ruihua Wang, Miao Li

MDE: A Novel MOD-Based DOA Estimation.......................................................394
Ting Li, Guobin Yang, Zhengyu Zhao, Gang Chen, Hao Qi, Peng Zhu

Research on Public Rental Housing Project Safety Assessment Model with Linguistic Information.............................................................................................405
Xiang Gu, Xingsu Li

Using Trusted Computing for Protecting Vehicular Routing..............................412
Hongdi Ke, Hui Wang, Hongchang Ke

Image encryption and hiding method based on double-random-phase-encoding technique and LSB substitution.................................................................421
Jun Sang, Shenggui Ling, Haibo Hu, Bin Cai, Hongsheng Xu, Nong Sang

Research on Online Trading Customer Classification Based on Customer Characteristics and Behaviors.................................................................430
Li Xinwu
