Contents:

JDCTA: Editorial Board ................................................................. i
JDCTA: Call For Paper & Special Issue ........................................... vi

Part 1.

Combining Multiple SVM Classifiers For Product Images Classification: A Comparative Study ................................................................. 1
Shijie Jia, Yuesheng Gu, Jie Zeng

An HVS-Based JPEG Image Watermarking Method for Copyright Protection 11
Ming Jiang, ZhaoFeng Ma, XinXin Niu, Yixian Yang

Information Pretreatment and Multi-criteria Decision Making in Fast Disaster Assessment ................................................................. 20
Xueyan Cao, Fayun Deng, Liang Liu, Xiaolin Li, Shiming Li

Emotion Identification of Uyghur Sentence Based on Language Feature ........ 31
Long Yu, Shengwei Tian, Jun Huang

Study on QoS Based Distributed Bandwidth Allocation in Information Convergence Network ................................................................. 39
Gang Wang, Tianshu Huang, Zenggang Xiong, Yaogai Hu

Controllers’ Parameters Selection Strategy for Artificial Climate Chest on Limit-cycles Analysis ................................................................. 45
Yiming Feng, Xiaoping Luo, Jinfei Chen, Wenyao Pang

A Note on Attribute Hierarchy Method ............................................. 53
Mengmeng Mao, Peng Wang, Shuliang Ding

Application of Improved Genetic Algorithm in Practical Medical Image Registration ................................................................. 60
Qiushi Wang, Xiongfei Li

A Novel Category Vector-Based Cross Language Text Categorization Method ................................................................. 68
Yingfan GAO, Hongjiao XU, Wei Yu, Huilin WANG
Reduce-reference Transmission-aware Video Quality Metric for MPEG-4 Encoded Videos over Lossy Wireless Network ............................................... 78
Yan Yang, Xingming Wen

A Panoramic Video Distributed System used in LAN ................................. 88
Lin Zeng, Dexiang Deng, Shilei Sun, Yunlu Zhang

Analysis of Service Quality and User Satisfaction Improvement in Public Transportation System .......................................................................................................................... 95
Samin Salemi, Ali Selamat, Md Hafiz Selamat

A Novel Haptic Deformation Modelling Method using Spherical Harmonic Representation and Radial Basis Function Neural Network ..................... 105
Yanhong Fang, Bin Wu, Zhengyi Yang

Scene Recognition Based on Saliency Building and Local Features ............. 112
Shuo Chen, Chengdong Wu, Xiaosheng Yu, Dongyue Chen

Utterance Generation Using Twitter Replying Sentences and Character Assignment ................................................................................................................................. 119
Dongli Han, Yasuhiro Kinoshita, Ryu Fukuchi, Tsurugi Kousaki

Knowledge Management Approach for Manufacturing Process Based on Semantic Web ................................................................................................................................. 127
Wang Qifeng, Zhou Liandong, Lv Hongbo

A Novel Internet of Things’ Paradigm for Smart Home Using Agent-Based Solution with Hybrid Intelligence ................................................................. 136
Huang Haiping, Wang Ruchuan, Qin Xiaolin, Sun Lijuan, Jin Yichao

Computational Prediction of Transcription Factor Binding Sites Based on HMM Model and Information Content ................................................................. 152
Xiaobao SU, Lifang LIU

Monitoring the Land Use Change and its’ Conversion Mechanism of Economic Core Corridor of Pearl River Delta Based on Remote Sensing Data in Recent Years ......................................................................................................................... 160
Fenglei Fan, Caige Sun, Zhongnuan Chen, Kaiwen Zhong, Yunpeng Wang

Semantic Query for Relational Databases ...................................................... 166
S. Zhou, G. Meng
A General Framework for Kansei Engineering System ........................................ 173
Chih-Chieh Yang, Chih-Cheng Sun, Pei-Ju Lin, Chi-Chen Tsai

A Novel Approach to Power Saving for Real-Time Systems ................. 181
Miao Wang, Taogai Zhang, Hongshan Qu, Jian Li

A Novell Security Framework for Web Application and Database ........ 190
Zhiyong Li, Sedeka Mahmoud El Shamy, Tamer Galal, Abdulkadir Adamu Abdulkadir, Lv Huang

The Sequence Design for Stochastic Computation ....................................... 199
Jienan Chen, Jianhao Hu, Zijun Xin

Modeling of Shipyard Ship Shifting Scheduling Problem and its Five-point Approach Method based on Dynamic Programming ........................................ 211
Jianping Chen, Jiawei Ye

Part 2.

The Text Mining Analysis of UN Security Council Resolutions No.1970 and No.1973 Based on Text Materials ................................................................. 219
Shianghau Wu, Jiannjong Guo

Research of a Configurability Framework of MES for Mechanical Processing Enterprise ................................................................. 234
Lei Qi, Pan Liwei, Guo Zhenjun, Zhou Peng

Radio Transmitter Verification Based on Elastic Sparsity Preserving Projections and SVDD ................................................................. 247
Yong Gong, Guyu Hu, Zhisong Pan, Yuhuan Zhou

Research on the Application of Virtual Reality in Arts Core Curricula .......... 255
Koun-Tem Sun, Hsin-Te Chan, Kuan-Chien Meng

Influence of Technical Parameters on the Mechanical Properties of Diamond Coating in Infrared Window ................................................ 263
Hongxiang Wang, Chun Xu

Embedding N-Detect Test Set into Controlled Bits Stream ....................... 271
Tieqiao Liu, Jishun Kuang, Weizheng Wang, Zhiqiang You, Shuo Cai
E-commerce System Security Assessment Based on Grey Relational Analysis Comprehensive Evaluation ............................................................. 279
Duolin Liu

An Approach to Ontology Information Mining Based on Relational Database 285
Yinglong Ma, Jinlong Zhang, Haijiang Wu, Baowang Lin

Improving Image Quality In Poor Visibility With Retinex-Based Adaptive Image Enhancement Method ................................................... 296
FU Qiang, LI Yi-bing, LIU Yue

The Efficiency of Evaluating the Flying Ability of Pilots Using Sternberg Dual-task Test and Influencing Factors .......................................................... 302
Jingdan Xie, Yebing Yang, Danmin Miao, Shu Wang, Xuesong Jin

Driver Fatigue Driving Detection Based on Eye State ................................. 307
Wei Sun, Xiaorui Zhang, Wei Zhuang, Huiqiang Tang

Noise Elimination of Vibration Signal of Distributed Optical Fiber-Sensing System Based on Wavelet Analysis ......................................................... 315
Qinghui Zhan, Zenggang Xiong, Gang Liu

Region-based Active Contour with Neighborhood Information for Image Segmentation ............................................................................. 322
Mingyu Yang, Jin Liu, Wensheng Zhang

Decision-directed Scheme for Error Compensation in Signal Detection of MIMO-OFDM Systems ................................................................. 330
Miin-Jong Hao, Yu-Chi Tsai

Incorporating Potential Energy Filed into Efficient Routing in Wireless Microsensor Networks ........................................................................ 339
Lifang Ge

Sentence-based Suffix Tree Clustering for Web Documents .......................... 346
Ruilong Yang, Hongtao Xie, Qingsheng Zhu

Accurately Forecasting Growth Trends of User-Generated Media in Taiwan Using Grey Theory ............................................................................. 355
Pi-Fang Hsu, Yi-hsuan Chiang, Min-Hua Kuo
Analysis of Internet Word-of-Mouth of Smartphone in Taiwan – Using Blogs and Forums as Examples ................................................................. 364
Li-Fen Tsai

iAWN: An Ambient Affective Medium for Meditative Use and Emotional Awareness in Home ........................................................................... 372
Yu-Pin Ma, Taysheng Jeng, Yang-Ting Shen, Po-Chun Chen

Customer Churn Prediction Based on Cluster Stratified Sampling Logistic Regression ................................................................................. 381
Zhang Kai-hui, Li Lei, Li Peng

The Security Assessment Method of Wireless Sensor Network with Interval Grey Linguistic Variables ............................................................... 389
Yuan Jiang, Dongming Jiang

Attribute-Based Access Control Mechanism for Perceptive Layer of the Internet of Things ............................................................................... 396
Ren Fang, Ma Jian-Feng

A Novel Hybrid Gene Selection Approach Based on ReliefF and FCBF ........ 404
JianJiao Chen, Anping Song, Wu Zhang

A Hybrid Heuristic Based on Constraint Propagation for the Job Shop Scheduling Problem .............................................................................. 412
Rui Zhang

Overview of The Partial Differential Equation Filter Method for The Electronic Speckle Pattern Interferometry Fringes ........................................... 419
Zhang Fang, Xiao Zhitao, Wu Jun, Xi Jiangtao
